6 The diagram shows triangle **A** drawn on a grid.

Kyle reflects triangle **A** in the x -axis to get triangle **B**.

He then reflects triangle **B** in the line $y = x$ to get triangle **C**.

Amy reflects triangle **A** in the line $y = x$ to get triangle **D**.

She is then going to reflect triangle **D** in the x -axis to get triangle **E**.

Amy says that triangle **E** should be in the same position as triangle **C**.

Is Amy correct?

You must show how you get your answer.
