Mock Grade 5

Maths Booklet 1

Paper 3H Calculator

www.ggmaths.co.uk

1 The diagram shows a hexagon. The hexagon has one line of symmetry.

$$FA = BC$$

 $EF = CD$
Angle $ABC = 117^{\circ}$

Angle $BCD = 2 \times \text{angle } CDE$

Work out the size of angle *AFE*. You must show all your working.

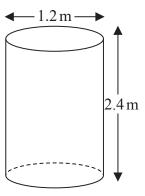

.....

2 Jeremy has to cover 4 tanks completely with paint.

Each tank is in the shape of a cylinder with a top and a bottom. The tank has a diameter of 1.2 m and a height of 2.4 m.

Jeremy has 12 tins of paint. Each tin of paint covers 9 m²

Has Jeremy got enough paint to cover completely the 3 tanks? You must show how you get your answer.

(Total for Question 2 is 5 marks

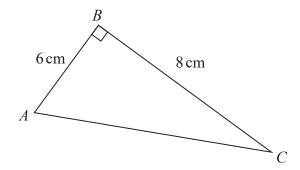

3 Work out

$$\sqrt{5.13 + 10.28} - 0.97$$

Give your answer correct to 3 significant figures.

(Total for Question 3 is 2 marks)

4 ABC is a right-angled triangle.

Here is Sarah's method to find the length of BC.

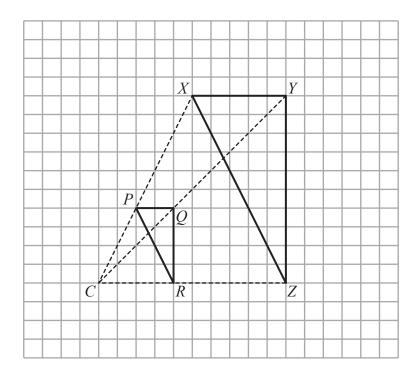

$$BC^{2} = AB^{2} + AC^{2}$$

$$= 6^{2} + 8^{2}$$

$$= 14^{2}$$

$$BC = 14$$

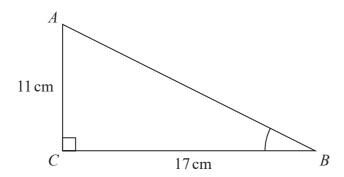

(a) What mistake has Sarah made in her method?

Roy is going to enlarge triangle PQR with centre C and scale factor 2	
He draws triangle <i>XYZ</i> .	
(b Explain why Roy's diagram is not correct.	
(1)	

(Total for Question 4 is 2 marks)

5 *ABC* is a right-angled triangle.

(a) Work out the size of angle *ABC*. Give your answer correct to 1 decimal place.

(2)	

The length of the side AC is reduced by 1 cm.

The length of the side BC is still 17 cm. Angle ACB is still 90°

(b) Will the value of tan *ABC* increase or decrease? You must give a reason for your answer.

(1)

(Total for Question 5 is 3 marks)

6 There are some counters in a bag.
The counters are red or white or blue or yellow.

Bob is going to take at random a counter from the bag.

The table shows each of the probabilities that the counter will be blue or will be yellow.

Colour	Red	Blue	Green	Yellow
Probability			0.35	0.21

There are 105 green counters in the bag.

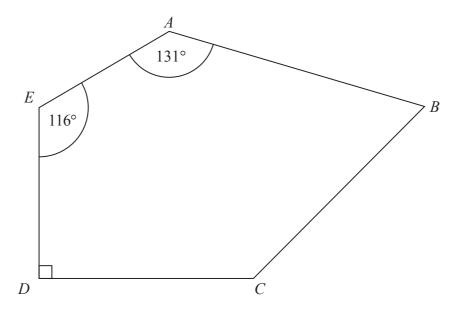

The probability that the counter Bob takes will be red is three times the probability that the counter will be blue.

1	(a)	Work	out the	number	of red	counters	in	the	hag
۱	a	WOIK	out me	Hullibel	or rea	counters	Ш	uie	uag.

	(4)
A marble is going to be taken at random from a box of marbles. The probability that the marble will be silver is 0.5	
There must be an even number of marbles in the box.	
(b) Explain why.	
	(1)
(Total for Question	n 6 is 5 marks)

7	Solve	$\frac{5-x}{3} = 3x - 11$				
					<i>x</i> =	
				(Total for Que	estion 7 is 3 marks)	_

8 ABCDE is a pentagon.

Angle $BCD = 2.5 \times \text{angle } ABC$

Work out the size of angle *BCD*. You must show all your working.
