85 79 73 6	
Find an expression, in terms of n , for the n th term of the sequence	ence.
(Tot	tal for Question 5 is 2 marks)
Here are the first five terms of a number sequence <i>S</i> .	
10 16 22 28	34
(a) Find an expression, in terms of n , for the n th term of this	sequence.
	(2)
The <i>n</i> th term of a sequence <i>T</i> is given by $n^2 - 3$	
There are numbers that are terms in both the sequence S and t	the sequence T .
(b) Find one of these numbers.	
	(2)

(Total for Question 6 is 4 marks)

7	Here are the first five terms of an arithmetic sequence.										
		1	5	9	13	17					
	(a) Find an expression, in terms of n , for the n th term of this sequence.										
						(2					
	The <i>n</i> th term of another arithmet	ic sequ	ience :	is 3 <i>n</i>	+ 5		,				
	(b) Find an expression, in terms of m , for the $(2m)$ th term of this sequence.										
						(1					
_					((Total for Question 7 is 3 marks	<u>)</u>				

8	The <i>n</i> th term of a sequence is $2n^2 - 1$
	The <i>n</i> th term of a different sequence is $40 - n^2$
	Show that there is only one number that is in both of these sequences.
	(Total for Question 8 is 3 marks)

9 The first four terms of a Fibonacci sequence are										
3 marks)										
5 marks)										

10	10 Here are the first four terms of an arithmetic sequence.									
		6	10	14	18					
((a) Find an expression, in terms of n , for the n th term of this sequence.									
(b) Write down an expression, in t	erms of i	n for the	(n + 1)th	term of this sequence	(2)				
(b) write down an expression, in t	cills of t	i, for the	(n + 1)tii	term of this sequence.					
						(1)				
				(Tota	al for Question 10 is 3 n	narks)				

11	11 In a warehouse there are two types of shelves, type R and type S.										
	These two types of shelves are arranged into shelving units that form a sequence of patterns.										patterns.
	Here are the first three to	rms in	the seq	uence	e.						
	R	S	R		R	S	R	S	R		Diagram NOT accurately drawn
					← 2.4 m		•	3.5 m			
		R	S	R	S	R	s	R			
	The width of each type I	R shelf	is 2.4 n	n and	the wic	lth of 6	each ty	pe S sh	elf is 3	3.5 m	
	(a) Work out the total w	idth of	a shelv	ing ur	nit that	has 6 t	type R	shelves	S.		

A shelving unit has n type \mathbf{R} shelves. The total width of this shelving unit is W metres.

(b) Find an expression for W in terms of n Give your answer in its simplest form.

$$W = \dots$$
